

## Create a MyKey:

- Insert key into ignition (or backup slot if your vehicle is equipped with push-button start).
- Switch ignition on.
- Select **Settings > MyKey > Create MyKey**.
- Press and hold **OK button** until a message appears prompting you to designate your key as a MyKey.

## Configure global MyKey settings:

- Switch ignition on, using "admin key" or fob. (The key you choose **not** to program will serve as your main key.)
- Select **Settings > MyKey**.
- Select **MyKey feature** you wish to program, and press **OK**.
- From this point on, starting your vehicle with a MyKey will activate the restricted driving mode you've programmed.

## Configurable settings:

- **Speed limit restriction and minders:**  
Restrict the top speed not to exceed 80 mph.  
Set vehicle speed minders that trigger visible and audible warnings at a preselected speed of 45, 55 or 65 mph.
- **"Always On" settings for:**  
Traction Control  
911 Assist<sup>27,28</sup>  
Do Not Disturb
- **Maximum audio volume of 45%.**
